

Your GitHub profile can become your personal website

Imagine a recruiter, professor or collaborator asking: “Show me what you can do.”

GitHub Profile → Projects → Portfolio Website

Dr. R. Varalakshmi
Dean of Academics, Associate Professor and Head
M.Sc. Data Science and Artificial Intelligence

GitHub Pages lets you publish a website from a GitHub repository.

METAPHOR: Repository = your workshop. GitHub Pages = the shop window.

Goal: turn your work into something people can discover, understand and remember.

What is GitHub Pages?

A GitHub service for publishing a website from content stored in a GitHub repository.

REPOSITORY

Your files, images, Markdown or site code.

PUBLISH

GitHub serves the selected website content.

WEB PAGE

Visitors open the published site in a browser.

Simple flow

Repository → Pages settings/workflow → Website → Visitor

Publishing a Website

Students can learn the publishing workflow using a simple practice site.

- 1

Create repository

Choose a clear project/site name.
- 2

Add website content

Start with README/HTML or a site structure.
- 3

Configure Pages

Choose the appropriate publishing source.
- 4

Wait for deployment

GitHub builds/publishes the site.
- 5

Open the site

Test links, images and layout.

Teaching demo idea: publish a one-page “My Learning Portfolio” site.

MODULE 5

GITHUB PAGES & PROFESSIONAL PORTFOLIO

- 0 1 GitHub Pages
- 0 2 Publishing a Website
- 0 3 **Personal Portfolio**
- 0 4 Academic Portfolio
- 0 5 Research Portfolio
- 0 6 Profile README
- 0 7 Badges & Pinned Repositories
- 0 8 Digital Resume
- 0 9 Sharing Projects
- 1 0 Higher Studies & Employment

6 HOURS
TOTAL MODULE

PORTFOLIO 1

03 / 10

Personal Portfolio

Show who you are, what you know and what you have built.

ABOUT ME

Email/contact method
GitHub profile

Metaphor: your portfolio is a digital exhibition of your best work.

Dr. R. VARALAKSHMI, Dean of Academics, Associate Professor and Head, M.Sc DS and AI

MODULE 5

GITHUB PAGES & PROFESSIONAL PORTFOLIO

- 0 1 GitHub Pages
- 0 2 Publishing a Website
- 0 3 Personal Portfolio
- 0 4 Academic Portfolio
- 0 5 Research Portfolio
- 0 6 **Profile README**
- 0 7 Badges & Pinned Repositories
- 0 8 Digital Resume
- 0 9 Sharing Projects
- 1 0 Higher Studies & Employment

6 HOURS
TOTAL MODULE

PORTFOLIO 2

06 / 10

Academic & Research Portfolio

Students can document learning, projects, publications and research interests.

ACADEMIC PORTFOLIO

- Education
- Courses/certifications
- Projects
- Skills
- Achievements
- Presentations

RESEARCH PORTFOLIO

- Research interests
- Publications
- Conferences
- Datasets/projects
- Research code
- Reports

Important: publish only information and materials you have permission to share.

0 1	GitHub Pages
0 2	Publishing a Website
0 3	Personal Portfolio
0 4	Academic Portfolio
0 5	Research Portfolio
0 6	Profile README
0 7	Badges & Pinned Repositories
0 8	Digital Resume
0 9	Sharing Projects
1 0	Higher Studies & Employment

Profile README = your GitHub introduction

Your profile can communicate your identity, interests, skills and selected work.

Hello, I'm Student Name 🙋

I am learning Data Science and GitHub.

Skills

Python • Git • Markdown

Current Projects

Attendance Analytics

Student Portfolio

Connect

GitHub • LinkedIn

PROFILE MESSAGE

“If someone visits my profile for 30 seconds, what should they remember?”

Badges & Pinned Repositories

Use small visual signals and selected projects to make the profile easier to scan.

BADGES

Examples:

Python • GitHub • Markdown

Course/certification badges

Use badges that are accurate and meaningful.

PINNED REPOSITORIES

Pin your strongest or most relevant repositories.

Think: “If a visitor opens only three projects, which three should they see?”

Metaphor: pinned repositories are the front display of your digital shop.

- 0 1 GitHub Pages
- 0 2 Publishing a Website
- 0 3 Personal Portfolio
- 0 4 Academic Portfolio
- 0 5 Research Portfolio
- 0 6 Profile README
- 0 7 Badges & Pinned Repositories
- 0 8 **Digital Resume**
- 0 9 Sharing Projects
- 1 0 Higher Studies & Employment

Digital Resume + Project Evidence

A digital resume becomes stronger when every claim can point to evidence.

DIGITAL RESUME

Education
Skills
Experience
Certifications
Achievements
Contact

EVIDENCE

Project repository
README
Demo / website
Research work
Documentation
Results

Resume claim → project evidence → visitor confidence

0 3	Personal Portfolio
0 4	Academic Portfolio
0 5	Research Portfolio
0 6	Profile README
0 7	Badges & Pinned Repositories
0 8	Digital Resume
0 9	Sharing Projects
1 0	Higher Studies & Employment

Portfolio for Higher Studies & Employment

The same portfolio can support different goals when you change what you highlight.

HIGHER STUDIES

Highlight:

- Research interests
- Academic projects
- Publications
- Technical skills
- Research notes
- Faculty/research collaboration

EMPLOYMENT

Highlight:

- Practical projects
- Problem-solving
- Technologies
- Team contributions
- Documentation
- Demonstrable results

Rule: don't show everything. Show the evidence most relevant to the opportunity.

FINAL CHALLENGE

10 / 10

Build your Professional GitHub Portfolio

Your GitHub profile should answer three questions: Who are you? What can you do? What have you built?

Create/complete your profile

Write a Profile README

Add a professional introduction

Pin 3 strong repositories

Improve README files

Add project screenshots/demos

Create a portfolio website

Add a digital resume

Share responsibly

BUILD → DOCUMENT → PUBLISH → SHARE → GROW

Closing CTA: Your GitHub profile is not just a profile. It can become your digital portfolio.
